Portfolio : <https://duraisingh.vercel.app/>

---

## SUMMARY

Results-driven **Frontend Developer (4+ years)** specializing in **React.js**, **Next.js**, and Angular. **Skilled in optimizing architecture**, developing **reusable components**, and seamless **RESTful API integration**. Proficient in **TypeScript**, **Redux**, and **Tailwind CSS**, delivering **clean and scalable user interfaces**. Proven ability to translate complex requirements into intuitive UI solutions that enhance performance.

## SKILLS

---

**Languages:** Html, CSS, Javascript, Typescript

**Frameworks / Libraries:** React ,Next.js ,Angular

**State & Data Management :** Redux Toolkit,React Query

**Styling / UI:** Bootstrap, Tailwind CSS, Sass,Ant Design, Style Components, GSAP

**APIs/Protocols :** GraphQL,Rest API ,Websockets ,WebRTC

**Tools & DevOps :** Git,Docker, ,Jira,Linux

## PROFESSIONAL EXPERIENCE

---

### DataSirpi | Senior Frontend Developer

August 2023 - Present

- Developed and managed responsive web applications utilizing both **React ,Next.Js and Angular** for diverse client projects.
- Collaborated with cross-functional teams to build high-quality, scalable user interfaces, ensuring all project deliverables were finished on time.

### Accubits Technologies | Frontend Developer

March 2022 - April 2023

- Crafted sleek, high-performance UIs using React, TypeScript, and Next.js, driving seamless team collaboration to deliver impactful web experiences and got **Accu Star Award**.

### XNOVAA DIGITAL CONSULTING | Frontend Developer

Dec 2020 - Jan 2022

- Created good-looking, easy-to-use websites using React, HTML, CSS, and JavaScript, ensuring high user utility

## KEY PROJECTS & CONTRIBUTIONS

---

### Go desk (Project Management Tool)

- Engineered "Go desk", a Jira-like project management tool using **Next.js**, **GraphQL** and **Tailwind CSS**. Implemented core modules such as project/task tracking, attendance, time tracking, real-time chat, and dynamic dashboards. Enhanced platform security with a robust role-based access control system.

### D2Defense (Secure Platform)

- Developed a modern defense web app using **React**, **Redux**, **WebSockets**, and **React Query**. Built core features like Secure Remote Desktop Access and a real-time alert dashboard. Enhanced efficiency and security through a script automation tool with validation, version control, and live execution tracking.

## **DS Integra (CRM)**

- Developed scalable, user-friendly interfaces for DS Integra CRM and omni-channel platform using **Vue.js** and **Sass**.
- Collaborated with designers and backend teams to deliver features enhancing UX and customer engagement.

## **Trojan ( Equipment Management )**

- Developed 'Trojan', an **Angular 6** and **SASS**-based equipment rental platform with secure role-based access. Improved admin visibility and streamlined data flow across user roles.

## **HRMS (Human Resource Management)**

- Developed a responsive HRMS using **Angular 16** and **Sass** with role-based access control, enabling secure, personalised onboarding and offboarding. Optimized performance, UI, and maintainability to enhance user experience and scalability

## **AVIS (NFT Platform)**

- Developed the Avis NFT platform for creating, buying, and selling NFTs using **Next.js**, **TypeScript**, **Redux**, and **Styled Components**, delivering a clean UI and seamless module integration.

## **Viva-Vita (E-commerce/Marketing Site)**

- Built a responsive, pixel-perfect **React** website for Viva-Vite coconut products using **Sass**, implementing smooth **GSAP** animations for an engaging user experience across all devices.
