DURAISINGH PANDI V

REACT JS FRONTEND DEVELOPER

9788621632 │ vduraisingh@gmail.com │ https://www.linkedin.com/in/durai-singh-320129116

SUMMARY

A skilled Front-End Developer with 3+ years of hands-on experience in React and Angular development. I excel at building responsive websites and delivering high-quality web applications. My technical expertise in JavaScript, HTML, and CSS, combined with strong problem-solving abilities, enables me to create efficient solutions that meet both user needs and business goals.

SKILLS

Languages: Html, CSS, Javascript, Typescript
Frameworks: React, Redux, Angular
Design Frameworks: Bootstrap, Ant Design, Tailwind CSS, Sass
Other Technologies: WebRTC, Rest API, Websockets, Docker, Linux, Git, Github actions & automations, GSAP.

PROFESSIONAL EXPERIENCE

DataSirpi   August 2023 - Present

- Developed and maintained multiple projects using Angular and React, demonstrating expertise in building dynamic, responsive web applications.
- Leveraged strong front-end skills to deliver high-quality, scalable solutions while collaborating with cross-functional teams to meet project requirements and deadlines.
- Provided mentorship and guidance to junior developers, fostering their growth and ensuring adherence to best practices and coding standards.

Accubits Technologies   March 2022 - April 2023

- I am a highly skilled web developer with over 2 years of experience in HTML, CSS, JavaScript, and React. Proficient in popular frameworks, including React and with a foundational understanding of React-Redux, I bring expertise in Advanced CSS, TypeScript, and Next.js.
- I have successfully developed visually appealing user interfaces and implemented dynamic functionality in previous projects. Known for being a collaborative team player, I am dedicated to delivering high-quality front-end solutions.

XNOVAA DIGITAL CONSULTING   Dec 2020 - Jan 2022

- Proficient in React, HTML, CSS, and JavaScript, with experience in designing and developing websites.
- Demonstrated ability to create visually appealing and functional web interfaces.

PROJECTS

D2Defense   April 2024 - Present

- Developed D2Defense: Led the development of a modern device management platform using React, SASS, React Query, and Redux.

- Implemented Remote Desktop Feature: Enabled secure remote desktop access to meet organizational needs, enhancing device management capabilities.
- Activity Monitoring: Designed a real-time activity tracking dashboard with customizable alerts and detailed event logging.
- Script Automation: Developed a secure script management system with validation, versioning, and real-time status monitoring capabilities.

DS Integra (CRM)

- Contributed to the development of DS Integra, a comprehensive CRM and omni-channel platform, enhancing customer relationship management and multi-channel communication capabilities.Leveraged strong front-end skills to deliver high-quality, scalable solutions while collaborating with cross-functional teams to meet project requirements and deadlines.
- Leveraged Vue.js for dynamic, responsive front-end development and SASS for efficient and maintainable styling, resulting in a user-friendly and visually appealing interface.

Trojan

- Developed 'Trojan,' an equipment rental platform using Angular, implementing role-based access control to ensure each user can interact with relevant data while providing full access to the admin for comprehensive data management.
- It's an Angular-based equipment rental system with a robust role-based data access structure, allowing secure and efficient management of user-specific data and full administrative oversight.
- Led the development of 'Trojan,' an equipment rental platform built with Angular, focusing on a multi-role data access system, where each user accesses tailored data, and the admin maintains complete visibility across all data flows.

HRMS   Aug 2022 - Apr 2023

- Enabled employee onboarding and offboarding with tailored data access based on user roles, enhancing data security and operational efficiency.
- Built and styled the HRMS application, ensuring a responsive and maintainable codebase with a focus on user experience and performance.
- Implemented role-based access control, ensuring only authorized users could access specific data, thus safeguarding sensitive employee information.

AVIS   Mar 2022 - Aug 2022

- Built a blockchain-based platform for creating, buying, and selling NFTs, using React, Next.js, TypeScript, and Styled Components.
- Delivered clean UI design and code, ensuring seamless module integration on the Avis NFT platform.
- Earned the **Accu Star Award** for timely completion of the Avis NFT project.

Viva-Vita   Oct 2021 - Jan 2022

- Developed the Viva-Vate coconut product website, a static site using React.
- Integrated dynamic animations with GSAP to enhance user experience.
- Ensured smooth and responsive design across devices.
- Implemented pixel perfect design replicating Figma design

Future Gril   **Dec 2020 - Oct 2021**

- Worked on SignIn, SignUp, UserProfile, TransferNFT, and BulkUpload features for the FutureGril NFT project.
- Contributed to both Admin and User modules, enhancing functionality and user experience.
- Focused on implementing key functionalities to support seamless user interactions and efficient NFT management.
